SKion Water family grows following Enpure acquisition

Water companies across the globe face unprecedented challenges, ranging from aging infrastructure to tighter regulatory permits to pressure from the regulator on costs. These challenges are further aggravated by climate change. Climate change and water are inextricably linked; majority of climate change related disasters manifest themselves through water. This is reflected through an increase in drought and flooding incidents in recent years, on a global scale. Covid-19 and the global political environment has further exacerbated the challenges water companies face.

Enpure has been a trusted partner for water companies across the globe. Enpure has been supporting water companies in developing solutions that tackle diverse and complicated challenges such as regulatory pressures and water scarcity. They have been delivering complex projects of the highest quality, ranging from Desalination plants in the Middle East to Energy-from-Waste plants in the Midlands, UK.

Dr. Reinhard Hübner, CEO of SKion Water: “Enpure is a strategic acquisition by SKion Water, with the aim to continue supporting water companies in the UK with cost-efficient solution delivery expertise through this and future regulatory periods. SKion Water will also support Enpure in growing its footprint in other sectors including energy, paper as well as food and beverage and further solidify its global presence through its market-leading DAF system.”

Avtar Jirh, CEO of Enpure Limited: “We are delighted to have become part of the SKion Water family. As we begin the next chapter for Enpure under this new ownership, we have the opportunity to expand our engineering expertise to the UK and overseas markets. We are looking forward to a bright future working with SKion Water and the other subsidiary companies within the Group to further strengthen our presence as a key player in the global water market.”

About SKion Water

SKion Water GmbH – through its operational subsidiaries Ovivo, EnviroWater Group, ELIQUO WATER GROUP, Enpure, Paques, Ecopreneur, ADASA, inCTRL and Matten – is a technology and solution provider, as well as a plant manufacturer, in both municipal and industrial water and wastewater technology. SKion Water also invests in innovative water technology companies if the respective technology is a fit with the existing portfolio. SKion Water is a subsidiary of SKion GmbH, the investment company of German entrepreneur Mrs. Susanne Klatten.

About Enpure

Enpure Limited is a process engineering company specializing in water, wastewater and sludge treatment as well as waste-to-energy solutions with a global presence. Based in the UK, we are a wholly-owned subsidiary of SKion Water Group.

Our extensive expertise, proven designs and advanced technologies enable us to provide treatment solutions incorporating our specialist knowledge in filtration, purification, sludge treatment, biogas upgrading and anaerobic digestion of various feedstocks including sewage sludge, food waste and farming by-products.

We offer our capabilities in feasibility assessments, concept development, design & engineering, construction and commissioning of turn-key projects along with the operation and maintenance of assets.
